## Abu-Ghazaleh: IASCA Issues the Arabic Translated Version of the 2020 International Financial Reporting Standards

AMMAN – HE Dr. Talal Abu-Ghazaleh, chairman of the International Arab Society of Certified Accountants (IASCA), announced the issuing of the latest Arabic translated version of the 2020 International Financial Reporting Standards (IFRS) in cooperation with the IFRS Foundation.

This edition is the sole official printed version of the consolidated text issued by the International Accounting Standards Board (IASB) on January 1, 2020 and was translated by the Saudi Organization for Certified Public Accountants (SOCPA).

Dr. Abu-Ghazaleh underlined the most important amendments in the 2020 version which include:

- The main change made since January 1, 2019 is Interest Rate Benchmark Reform which amends IFRS 9 Financial Instruments, IAS 39 Financial Instruments: Recognition and Measurement and IFRS 7 Financial Instruments: Disclosures.

- Interest Rate Benchmark Reform amends IFRS 9, IFRS 7 and IAS 39 and is effective from January 1, 2020.

The amendments modify some specific hedge accounting requirements to provide relief from potential effects of the uncertainty caused by the reform of benchmark interest rates, such as interbank offer rates (IBORs). In addition, the amendments require an entity to provide additional information to investors about its hedging relationships which are directly affected by any such uncertainty.

It is worth mentioning that IASCA signed a cooperation agreement with the IFRS Foundation to re-print, publish, and distribute the IFRS 2019 and the International Standards in Small and Medium-sized Enterprises 2019 books; accordingly, the Society will distribute the two publications to all Arab countries. The 15-year of mutual cooperation between the Society and the IFRS indicates the keenness of IASCA to serve the accounting profession and professionals at regional and global levels.

IASCA was established on January 12, 1984 as a non-profit professional accounting body in London – UK. It was officially registered in Amman on February 24, 1994. IASCA also aims at upgrading the field of accounting and auditing and other related subject matters on the international level, in addition to maintaining the professional independency of accountants and guaranteeing their protection, along with applying the professional oversight standards as a means to enhance the accounting and auditing professions.

---

## IFRS Foundation Trustees Announce Working Group to Accelerate Convergence in Global Sustainability Reporting Standards

LONDON - The Trustees of the IFRS Foundation announced the formation of a working group to accelerate convergence in global sustainability reporting standards focused on enterprise value and to undertake technical preparation for a potential international sustainability reporting standards board under the governance of the IFRS Foundation.

The working group will provide a forum for structured engagement with initiatives focused on enterprise value reporting, as

described by the Trustees' [March 8 statement](#). It also responds to [the February 24 statement](#) by the International Organization of Securities Commissions (IOSCO), calling for the coordination of work to drive international consistency of sustainability-related disclosures with a focus on enterprise value creation.

Specifically, the working group will provide technical recommendations, including further development of [the prototype](#) built on the TCFD recommendations, as a potential basis for the new board to build on existing initiatives and develop standards for climate-related reporting and other sustainability topics. The group will also review how technical expertise and content might potentially be transitioned to the new board under the IFRS Foundation's governance structure, with a view to facilitating consolidation and reducing fragmentation in sustainability reporting standards.

The working group will be chaired by the IFRS Foundation and include participation by the IASB, given the need for connectivity with financial reporting. IOSCO will participate in the group as an observer, given the essential role it would play in evaluating and endorsing standards issued by a new board. During this preparatory phase, the working group also welcomes engagement with jurisdictions that are working on sustainability reporting.

Participants in the working group are dedicated to reporting on enterprise value and bring together complementary international experience. The Financial Stability Board's Task Force on Climate related Financial Disclosures (TCFD) brings recommendations for climate-related disclosures that promote more informed investment, credit and insurance underwriting decisions.

The Value Reporting Foundation brings international standard-setting experience. It represents the intended merger of [the International Integrated Reporting Council \(IIRC\)](#), which provides a framework for integrated reporting that connects financial and sustainability information, and [the Sustainability Accounting Standards Board \(SASB\)](#), which provides industry-specific standards for reporting on enterprise value.

These initiatives are joined by the Climate Disclosure Standards Board (CDSB), whose framework guides disclosure of material information for investors through the integration of climate, wider environmental and social-related information into financial reporting.

[Finally, the World Economic Forum \(WEF\)](#) will contribute their work on cross-industry metrics and disclosures that CEOs of a wide range of the world's largest multinational companies have found to be important for disclosure. Throughout this process, the working group will also engage closely with the [Global Reporting Initiative \(GRI\)](#) and [CDP](#).

The first meeting of the working group is expected to take place in April 2021, with updates on progress published on the IFRS Foundation website.

### **Compatibility with other initiatives**

Consistent with the March 8 statement, as well as IOSCO's recent press statement, the Trustees envisage that sustainability reporting standards issued by the new board would provide a global sustainability reporting baseline that would allow for greater comparability and consistency of application of the standards, while also providing flexibility for coordination on additional jurisdictional and multi-stakeholder reporting requirements (a 'building blocks' approach).

In this spirit, and in parallel to the working group, the Trustees will commence work with IOSCO and relevant organizations to explore the establishment of a multi-stakeholder expert consultative committee within the IFRS Foundation structure. The consultative committee would be tasked with formalizing and streamlining the new board's engagement with the relevant global stakeholders involved in sustainability reporting.

### **Project leadership**

Clara Barby will take partial leave from the [Impact Management Project \(IMP\)](#) to be the project lead for the IFRS Foundation's sustainability project, under the oversight and strategic direction of the IFRS Foundation's Steering Committee of Trustees. This is complementary to her role as a facilitator for standard-setting organizations looking to achieve global convergence on sustainability reporting.

## IFRS Foundation Trustees Announce Strategic Direction and Further Steps based on Feedback to Sustainability Reporting Consultation

LONDON - The Trustees of the IFRS Foundation met March 2-4, 2021 to continue their analysis and discussions of the feedback received to their [Consultation Paper on Sustainability Reporting](#) (2020 Consultation).

[Feedback to the 2020 Consultation](#) confirmed an urgent need for global sustainability reporting standards and support for the Foundation to play a role in their development. The Trustees are therefore continuing their work on the establishment of an international sustainability reporting standards board within the existing governance structure of the IFRS Foundation, as set out in the [Trustees' February announcement](#).

The Trustees welcomed the February 2021 [public statement by the IOSCO Board](#), announcing IOSCO's intention to work with the IFRS Foundation in developing a plan to establish a new board for setting sustainability reporting standards that meet the needs of the capital markets. This will include consideration of future endorsement of the new board and its standards. The Trustees recognize the importance for the public interest of reporting standards that address enterprise value, which captures expected value creation for investors in the short, medium and long term and is interdependent with value creation for society and the environment.

Based on the feedback to the 2020 Consultation, and encouraged by the IOSCO Board statement, the Trustees have reached the following views about the strategic direction of a new board:

- Investor focus for enterprise value: the new board would focus on information that is material to the decisions of investors, lenders and other creditors.
- Sustainability scope, prioritizing climate: due to the urgent need for better information about climate-related matters, the new board would initially focus its efforts on climate-related reporting, while also working towards meeting the information needs of investors on other ESG (environmental, social and governance) matters.
- Build on existing frameworks: the new board would build upon the

well-established work of the Financial Stability Board's [Task Force on Climate related Financial Disclosures \(TCFD\)](#), as well as work by the alliance of leading standard-setters in sustainability reporting focused on enterprise value. The Trustees will [consider the prototype proposed by the alliance](#) for an approach to climate-related disclosures as a potential basis for the new board to develop climate-related reporting standards. To prepare for this work, the IFRS Foundation will initiate a process of structured engagement with the relevant organizations.

- Building blocks approach: by working with standard-setters from key jurisdictions, standards issued by the new board would provide a globally consistent and comparable sustainability reporting baseline, while also providing flexibility for coordination on reporting requirements that capture wider sustainability impacts.

The Trustees intend to publish a feedback statement that summarizes the responses received to their 2020 Consultation, and how that feedback informed the above decisions. Together with the feedback statement, the Trustees will publish for public comment the proposed changes to the Foundation's Constitution necessary to formalize establishment of a new board, including its composition. The Trustees will continue to engage with the IFRS Foundation Monitoring Board and be informed of their views to proposed changes. Any changes to the Constitution are subject to a public consultation with a 90-day comment period.

The Trustees remain on track to make a final determination about a new board in advance of the November 2021 United Nations COP26 conference, including the detailed analysis of feedback on the requirements for success outlined in the 2020 Consultation and other conditions to be satisfied prior to that consideration.

## IESBA Releases Additional Guidance on its Proposed Definition of a Public Interest Entity

### Supplementary Publication to Support Local Adoption and Implementation

LONDON - The IESBA released [a new staff publication](#) providing additional context to the Board's recently proposed revisions to the definition of a public interest entity (PIE). This staff publication supplements the guidance material in the explanatory memorandum of the Exposure Draft [Proposed Revisions to the Definitions of Listed Entity and Public Interest Entity in the Code](#) (PIE ED), which was released in January.

This staff publication will assist local regulators, national standard setters or other relevant local bodies in considering and planning adoption of the revised PIE definition when finalized and issued by the IESBA. The IESBA recognizes that there may be refinements to the proposals as a result of the comments received on exposure.

#### About IESBA

The International Ethics Standards Board for Accountants (IESBA) is an independent global standard-setting board. The IESBA's mission is to serve the public interest by setting ethics standards, including auditor independence requirements, which seek to raise the bar for ethical conduct and practice for all professional accountants through a robust, globally operable International Code of Ethics for Professional Accountants (including International Independence Standards) (the Code).

## IASB Amends IFRS Standards to Improve Accounting Policy Disclosures

NEW YORK- The International Accounting Standards Board has issued narrow-scope amendments to IFRS Standards.

The amendments will help companies:

- Improve accounting policy disclosures so that they provide more useful information to investors and other primary users of the financial statements; and
- Distinguish changes in accounting estimates from changes in accounting policies.

Following feedback that more guidance was needed to help companies decide what accounting policy information should be disclosed, the Board has issued amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements. The amendments to IAS 1 require companies to disclose their material accounting policy information rather than their significant accounting policies. The amendments to IFRS Practice Statement 2 provide guidance on how to apply the concept of materiality to accounting policy disclosures.

Separately, the Board has also issued amendments to IAS 8 Accounting Policies,

Changes in Accounting Estimates and Errors. The amendments clarify how companies should distinguish changes in accounting policies from changes in accounting estimates. That distinction is important because changes in accounting estimates are applied prospectively only to future transactions and other future events, but changes in accounting policies are generally also applied retrospectively to past transactions and other past events.

The amendments to IAS 1 and IAS 8 will be effective for annual reporting periods beginning on or after 1 January 2023, with early application permitted.

Source: [www.ifrs.org](http://www.ifrs.org)

## IASB Proposes to Extend Support for Lessees Accounting for COVID-19-related Rent Concessions

NEW YORK- The International Accounting Standards Board (IASB) [published for consultation a proposal](#) to extend by one year the application period of the amendment to IFRS 16 Leases issued in 2020 to help lessees accounting for COVID-19-related rent concessions.

The original amendment was issued in May 2020 to make it easier for lessees to account for COVID-19-related rent concessions, such as rent holidays and temporary rent reductions, while continuing to provide useful information about their leases to investors. The practical relief currently applies to rent concessions that reduce only lease payments due on or before June 30, 2021.

In response to calls from stakeholders and because the COVID-19 pandemic is still at its height, the Board proposes to extend the relief to cover rent concessions that reduce only lease payments due on or before June 30, 2022.

The Trustees of the IFRS Foundation have approved a shorter-than-normal comment period of 14 days for this consultation due to the urgent nature of the proposal.

The deadline for [submitting comments on the Exposure Draft COVID-19-Related Rent Concessions beyond 30 June 2021 \(Proposed amendment to IFRS 16\)](#) is February 25, 2021.

## IFAC and ICAEW Release Fifth Installment of Six-Part Anti-Money Laundering Educational Series

Segment Examines the Implications of Money Laundering on Tax Advice

LONDON - Together with ICAEW, The International Federation of Accountants (IFAC) released the fifth installment in its Anti-Money Laundering: The Basics educational series: [Installment 5: Tax Advice](#).

The publication is part of a 6-month short series helping accountants enhance their understanding of how money laundering works, the risks they face, and what they can do to mitigate these risks and make a positive contribution to the public interest.

Installment five examines tax advice and the multiple ways in which tax services may be vulnerable to money laundering.

The installment series, with its focus on accessibility and ease of use, will be a resource for Small and Medium Practices

(SMPs,) and accountants less familiar with AML, while also providing guidance for those looking for a quick refresher or reference.

Anti-Money Laundering: The Basics is featured on both the IFAC [\(landing page\)](#) and ICAEW websites and available for download for free. To be globally relevant, the series uses the risk-based approach of the Financial Action Task Force (FATF) -- the global money laundering and terrorist financing watchdog -- as a starting point.
