Abu-Ghazaleh: Our Agreement with An-Najah University is Part of IASCA's Efforts to Raise the Bar of Professional Performance in Palestine and the Arab Region

RAMALLAH - The International Arab Society of Certified Accountants (IASCA) signed a Memorandum of Understanding (MoU) with An-Najah National University with the aim of strengthening partnership and cooperation between the two parties in several areas.

The MoU was signed by IASCA's Board Member and Representative in Palestine, Mr. Jamal Milhem as a representative of HE Dr. Talal Abu-Ghazaleh, IASCA chairman, and Prof. Abdel Nasser Zaid, president of the University, in the presence of several representatives of the University and IASCA.

Commenting on the agreement, Dr. Abu-Ghazaleh expressed his pride in cooperating with An-Najah National University, pointing out that this cooperation comes as part of IASCA's efforts exerted to raise the bar of educational, academic and professional performance in Palestine and the Arab region.

It is worth mentioning that such an agreement with An-Najah University comes in accordance with the vision of Dr. Abu-Ghazaleh to reinforce IASCA's mission in developing and facilitating the process of information sharing and exchange among professional accountants regarding the professional issues which would be carried out through the development, compilation, and publication of educational research.

Through this MoU, the two parties seek to cooperate in professional training and qualification in the areas of accounting, auditing, and the relevant disciplines. The University's premises will be approved as an exam center for the professional certificates issued by IASCA.

Moreover, the University will cooperate with IASCA in organizing seminars, conferences, workshops, scientific and academic activities, as well as exchanging scientific researches and dissertations.

Mr. Milhem praised the global advanced level achieved by An-Najah National University, and its progress in the international rankings of universities, pointing out that the partnership with the University promotes IASCA's vision that aims at establishing accounting, auditing and behavioral standards along with building capabilities and enhancing students' skills through internationally recognized education, examination and qualification programs; to supply the local, Arab and international markets with qualified accountants that meet the international qualification criteria.

On the other hand, Prof. Abdel Nasser Zaid stated that the University seeks to cooperate with various educational institutions that have common goals for the purpose of developing students' skills and capabilities through professional training that integrates the theoretical foundations and practical skills needed to meet the current and future labor market requirements.

In 1977, An-Najah National University was established as a public University, to prepare professional human cadres to become qualified for leadership, and develop their skills in all fields of life. The University aims at providing its students with distinguished scientific knowledge and individual skills that enhance their ability to compete in the local, Arab and international markets. Furthermore, the University seeks to fulfill the needs of the community regarding the sustainable economic, social, human, and technical development, along with contributing to the enrichment of the human

knowledge and preserving the cultural and religious heritage of the Palestinian people.

In 1984, IASCA was established in London, UK, as a non-profit, professional, accounting body. It was formally registered in Amman on February

24, 1994, with the aim to advance the profession of accounting, auditing and other related disciplines in the countries of the Arab League, in addition to preserving the professional independence, protecting accountants, and applying the standards of professional supervision over them.

Dr. Abu-Ghazaleh Instructs Institutions, He Chairs, to Publish the “Environmental Accountability” Guide for Free on their Websites

AMMAN - The International Arab Society of Certified Accountants ([IASCA](#)) and the Arab Society Certified Accountants ([ASCA-Jordan](#)), published a Guide to the accounting treatment and financial reporting for environmental costs (Environmental Accounting), on their websites as well all as all the websites of Talal Abu-Ghazaleh Global ([TAG.Global](#)) for free.

The Guide will be free of charge in line with the directives and vision of HE Dr. Talal Abu-Ghazaleh, chairman of IASCA and ASCA, with a view of protecting the environment, which he has been calling for years, and has now become the main concern of the world.

The Guide highlights the topics related to accounting and financial reporting in terms of environmental costs and obligations, as it is designed to assist institutions and regulators concerned with setting standards on the best accounting practices for environmental transactions and events that should be included in the financial statements and the notes thereof.

The Guide also covers the issues related to environmental accounting in relation with institutions (whether those that aim at achieving profits, NGOs, or governmental institutions such as municipalities

or state institutions), because issues such as environmental pollution are becoming an economic, social and political burden worldwide. Real measures are taken at the national and international levels to protect the environment and minimize the consequences of environmental pollution.

The Guide explains the impact of an organization’s environmental performance on its financial position, and the way it uses financial information to assess and manage environmental risks. The handbook also focuses on the accountability of any organization’s management for the financial implications of managing environmental resources that are related to its activities.

Abu-Ghazaleh Approves Granting Free Membership to IACPA Holders

AMMAN - HE Dr. Talal Abu-Ghazaleh, chairman of the Arab Society of Certified Accountants (ASCA-Jordan) and the International Society of Certified Accountants (IASCA), approved granting successful students; who obtained the IACPA Qualification Certificate, a free membership at ASCA, starting from the December 2021 session for one year.

Dr. Abu-Ghazaleh pointed out that the aim of giving this free membership is based on ASCA's keenness to encourage professional accountants to develop their practical skills and enhance their knowledge in financial accounting and management, and allowing professional accountants to participate in the activities

and events conducted by the Society. That is in addition to give them access to the Arabic translated professional publications in accounting, auditing and other relevant disciplines.

Fines, Penalties and Sanctions in the Jordanian Income and Sales Tax Law "TAX.JO" and the UAE's Value Added Tax Law "VAT.UAE"

- **Dr. Muhammad Abdullah Souan – IASCA Board Member**
- **Dr. Hossam El Din Ahmed Khalil – IASCA Board Member**
- **Professor Wasfi Hussein Al-Tarawneh - Assistant Director of Income and Sales Tax Department - Jordan**

This book is comprehensive as it includes all the particularities of fines, penalties, and sanctions related to income and sales tax in the Hashemite Kingdom of Jordan, as well as the value added tax (VAT) in the UAE. It addresses the requirements of these laws and the instructions thereof in the two sister countries from the practical perspective.

Moreover, the book includes the implementation aspects of the income, sales tax and the VAT, along with practical cases rather than narrative ones, beside illustrative tax instructions.

The book meets the needs of individuals, firms, students - in universities and institutes, lawyers, researchers, and those interested in obtaining professional certificates, as well as all the segments of the society including taxpayers, investors, auditors, tax experts, in addition to those who work in the preparation of tax returns such as consultants, tax agents, and inspectors. The authors of the book were keen to introduce a brief about the application of VAT in UAE, as it is impossible to learn

about the administrative breaches and fines without addressing some concepts relevant to the VAT.

The tax system is defined as the formulation and translation of tax policies that are developed by governments while taking the political and economic conditions in consideration to achieve the desired goals. The general goals of governments include the distribution of resources and the coverage of expenses

in a manner that achieves social justice. Sometimes, governments face challenges in covering the expenses, regardless of whether they are current or capital, as this differs from one country to another.

Taxes are closely related to the political and social systems in countries. Therefore, the goals, purposes, and collection methods differ from one country to another. In conjunction with that, tax accounting is a branch of accounting that is based on the preparation of financial statements that are used as a basis of tax collection. The financial statements define the taxable income of the taxpayer, and eventually the amount of tax due in accordance with the income tax law.

The scientific material of this book has been divided into several chapters as follows:

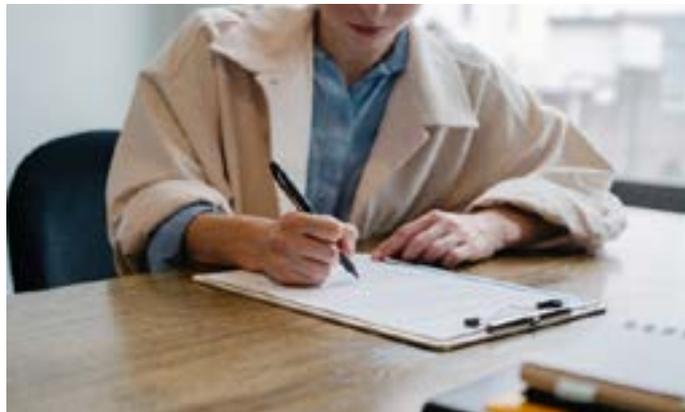

1. Chapter I: Fines, penalties and sanctions in the income tax in the Hashemite Kingdom of Jordan.
2. Chapter II: Fines, penalties and sanctions in the sales tax in the Hashemite Kingdom of Jordan.
3. Chapter III: Fines, penalties and sanctions in the value added tax (VAT) in the United Arab Emirates.

This book was based on several scientific references such as:

1. Income Tax Law No (34) for 2014 and the amendments therefore, and the regulations and instructions issued in accordance with that law.
2. General Sales Tax Law No (6) for 1994 and the amendments therefore, and the regulations and instructions issued in accordance with that law.
3. Hossam El-Din Ahmed and Wasfi Hussein Al-Tarawneh; Tax Accounting, Applications in Income and Sales Tax Accounting, according to the International Financial Reporting Standards (IFRS) 2019.
4. Guidelines issued by the Federal Tax Authority.
5. The Unified Agreement on Selective Tax for the GCC.

IASCA Holds IACPA Exam for the Second Time in 2021

AMMAN - The International Arab Society of Certified Accountants (IASCA) held the International Arab Certified Public Accountant (IACPA) exams throughout the Arab world for the second time during the year 2021.

The IACPA curriculum has been developed according to international accounting and auditing standards, with the participation of experts from IASCA. The qualification

has been approved by a group of Arab countries to practice the profession of auditing with the purpose of licensing the practice of public accounting profession. These countries include Jordan, the UAE, Yemen, Syria, Lebanon, Sudan, Qatar, and Kurdistan Region (Iraq).

The results of the December session exams will be announced by the end of January 2022 on the Society's website.

IASCA Concludes ‘Preparation of Budgets and Introduction to Strategic Planning’ Training Course

AMMAN - The International Arab Society of Certified Accountants (IASCA) held the training course entitled “The Preparation of Budgets and Introduction to Strategic Planning”, digitally organized for a group of employees from various sectors.

During the course, several topics related to Strategic Planning, Liquidity Analysis, Profitability Analysis, Activity Analysis, the Importance of Budgets in Planning and Control, the Preparation of the Statement of Income and Financial Position, Assessment of Decisions, the Tradeoff between Purchasing and Manufacturing, and Allocation of Resources, in addition to other topics were discussed.

The course aimed at enabling participants to get familiar with the advanced scientific basis of strategic planning, and how to analyze the internal environments and specify the weaknesses and strengths of these environments, the use of KPI’s in financial planning and the use of the basis of budgets building as an effective planning tool, in addition to, the use of cash flows in

evaluating strategic decisions, and use of differential analysis in making and evaluating strategic decisions.

It is worth mentioning that the participants in the digital training courses provided by ASCA can attend the lectures whenever they prefer through the recordings allowed by the system of the digital courses. Participants can also obtain electronic certificates of attendance and ask questions which will be answered by the best experts in the Arab world, in order to attain the required results.

IASB Provides Transition Option to Insurers Applying IFRS 17

LONDON - The International Accounting Standards Board (IASB) issued a narrow-scope amendment to the transition requirements in IFRS 17 Insurance Contracts, providing insurers with an option aimed at improving the usefulness of information to investors on initial application of the new Standard.

The amendment relates to insurers’ transition to the new Standard only—it does not affect any other requirements in IFRS 17.

IFRS 17 and IFRS 9 Financial Instruments have different transition requirements. For some insurers, these differences can cause temporary accounting mismatches between financial assets and insurance contract liabilities in the comparative information they present in their financial statements when applying IFRS 17 and IFRS 9 for the first time.

The amendment will help insurers avoid these temporary accounting mismatches and, therefore, will improve the usefulness

of comparative information for investors. It does this by providing insurers with an option for the presentation of comparative information about financial assets.

IFRS 17, including this amendment, is effective for annual reporting periods starting on or after January 1, 2023.

Druckman Recognized with IFAC Global Leadership Award for Outstanding Contributions to the Accountancy Profession

NEW YORK - The International Federation of Accountants (IFAC) selected Mr. Paul Druckman of the United Kingdom as the 2021 recipient of the IFAC Global Leadership Award, recognizing his contributions to the advancement of the global accountancy profession and capital markets.

Mr. Druckman is a passionate global leader in capital market reform, bringing about significant advancements in corporate governance and corporate reporting to enhance accountability for responsible business and sustainability. He currently serves as the Chairman of both Clear Insurance and the World Benchmarking Alliance, which is developing transformative benchmarks to enable companies to accelerate their contribution to sustainable development goals.

After qualifying as a chartered accountant in 1979, and becoming a mathematics teacher and then IT entrepreneur, Mr. Druckman served as president of the Institute of Chartered Accountants in England & Wales (ICAEW) in 2004/5. Mr. Druckman subsequently acted as executive chair of the Prince of Wales's Accounting for Sustainability Project, and in this role he was central to the formation of the International Integrated Reporting Council (IIRC) to bring about an enhanced corporate reporting system relevant to the digital, knowledge-driven, and resource-constrained world of the 21st century. He led the IIRC as founding CEO achieving the development of the International Integrated Reporting Framework in 2013.

Mr. Druckman has also been a board member of the Financial Reporting Council (FRC) over two separate terms, including the post Enron era and then again until 2019. He also chaired the FRC's Corporate Reporting Council, which sets UK accounting standards.

"I am delighted that Paul has received the IFAC Global Leadership Award this year," said President of IFAC **Alan Johnson**. "While his roots are as a Chartered Accountant, his entrepreneurial spirit and drive have led him to a very successful career within the profession, one which we all benefit from through his insights into important emerging fields, such as technology and sustainability. Given the commitments by world leaders at COP26 that ends this week, Paul's vision for a sustainable world on which he has been campaigning for many years is hopefully now in sight".

Established in 2017 by the IFAC Board, the IFAC Global Leadership Award in Honor of Robert Sempier recognizes individuals who make outstanding contributions to the global accountancy profession. The award honors the contributions of Robert Sempier, IFAC's first executive director who greatly contributed to the development of the profession worldwide.

The Global Leadership Award was presented during IFAC's Council meeting, held virtually on November 10-11, 2021.

IASB Proposes Amendments to IAS 1 to Improve Information Companies Provide about Long-term Debt with Covenants

LONDON - The International Accounting Standards Board (IASB) [proposed amendments to IAS 1 Presentation of Financial Statements](#) to improve the information companies provide about long-term debt with covenants.

IAS 1 requires a company to classify a liability as non-current only if the company has a right to defer settlement of the liability for at least 12 months after the reporting date. However, such a right is often subject to the company complying with covenants after the reporting date. For example, a company might have long-term debt that could become repayable within 12 months if the company fails to comply with covenants after the reporting date.

The proposed amendments announced today would specify that, in such a situation, covenants would not affect the classification of a liability as current or non-current at the reporting date. Instead, a company would:

- Present non-current liabilities that are subject to covenants on the statement of financial position separately from other non-current liabilities; and
- Disclose information about the covenants in the notes to its financial statements, including their nature and whether the company would have complied with them based on its circumstances at the reporting date.

The IASB expects that these proposals will improve the information a company provides about non-current liabilities with covenants by enabling investors to assess whether such liabilities could become repayable within 12 months.

The proposals also address feedback from stakeholders about the classification of debt as current or non-current when applying [requirements introduced in 2020](#) that are not yet in effect. Consequently, the IASB is also proposing to defer the effective date of those requirements to align with the proposed amendment.

The Exposure Draft Non-current Liabilities with Covenants is [open for comment until March 21, 2022](#).

IFAC Publication Highlights Opportunities in Sustainability Information for Small Businesses and Their Advisers

NEW YORK – The International Federation of Accountants (IFAC) released a publication, [“Sustainability Information for Small Businesses: The Opportunity for Practitioners,”](#) exploring the diverse benefits of embracing sustainability information.

The report examines the importance of readily available, relevant, and reliable sustainability information for achieving better-informed decisions, enhanced strategic and risk management, and more thorough and valuable reporting to external stakeholders. It also highlights a range of emerging services that practitioners can provide to their clients,

including advisory services, reporting, agreed-upon procedures (AUP) engagements, and assurance services.

Small businesses make up more than 90 percent of businesses worldwide; they are critical to achieving sustainable outcomes for economies, the environment and society. They can find significant advantages

from establishing (or enhancing) processes, systems and controls for identifying, measuring, and analyzing sustainability information. This can include improved efficiencies and performance, as well as differentiation from competitors. Small businesses are also likely to be subject to sustainability-related reporting information requests from a diverse range of stakeholders, including large companies, banks, and suppliers—if they are not already.

This publication was developed with advice and guidance from the [IFAC Small and Medium Practices \(SMP\) Advisory Group](#) and builds on the Advisory Group's work on [practice transformation](#).

Although focusing on sustainability information and

related services may seem premature for some small businesses and practitioners, the field is growing quickly. To speak to different practitioners' unique circumstances, the publication includes suggestions on building knowledge and competencies and taking initial steps.

IFAC explored these issues further in a webinar on December 15 titled "[Sustainability Offers New Opportunities for SMPs](#)" (with simultaneous translation into Spanish and French). The webinar will feature a panel discussion with practitioners who are providing services in this space.

IASB Proposes Disclosure Requirements to Enhance the Transparency of Supplier Finance Arrangements

LONDON - The International Accounting Standards Board (IASB) to [enhance the transparency of supplier finance arrangements and their effects on a company's liabilities and cash flows](#).

Supplier finance arrangements are often referred to as supply chain finance, payables finance or reverse factoring arrangements.

The proposed targeted amendments to the current disclosure requirements are designed to meet investors' demands for more detailed information to help them analyze and understand the effects of such arrangements.

Under the IASB's proposals, a company would be required to disclose information that enables investors to assess the effects of the company's supplier finance arrangements on its liabilities and cash flows. These proposals would amend IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures. The proposals complement [an agenda decision published](#) by the IFRS Interpretations Committee in 2020.

The proposed amendments would affect a company that, as a buyer, enters into one or more supplier finance arrangements, under which the company, or its suppliers, can access financing for amounts the company owes its suppliers.

Andreas Barckow, Chair of the IASB, said:

[Investors require more detailed disclosures about companies' supply chain finance arrangements as these funding practices are becoming increasingly common. The proposed requirements are designed to give investors the information they need to assess the effects of such finance arrangements on a company's liabilities and cash flows.](#)

The Exposure Draft Supplier Finance Arrangements is [open for comment until 28 March 2022](#).

[Access the latest Investor Perspectives article](#) by IASB Member Zach Gast, who explains the IASB's proposals.
