Mapping Global Reporting and Assurance Practices

IASCA Holds IFRS Expert Examination

AMMAN - The International Arab Society of Certified Accountants (IASCA) held the IFRS Expert Examination for August 2021 session. It consisted of two sessions, the first for subjective questions, while the second for the essay questions.

IFRS Expert Examination aims to build and develop the necessary knowledge capabilities related to the understanding of the theoretical and conceptual aspects of the International Financial Reporting Standards (IFRS); and to develop the ability to professionally apply them in the practical accounting, assist in the ongoing professional development in the field of IFRS and follow up their amendments and updates.

It also targets accountants and financial managers who are responsible for the preparation of the financial reports, auditors, investment and banking sectors staff, in addition to lecturers specialized in the field of the International Financial Reporting Standards.

The results will be announced in September 2021 through IASCA's website:

<http://ascasociety.org>

Last Chance to Obtain IACPA Qualification

Announcement to Trainees who did not Fulfil the Requirements of the IACPA According to the Previous Session's System

AMMAN – The International Arab Society of Certified Accountants (IASCA) is pleased to inform the trainees who will resume their studies, or who failed in the exam based on the old system (the three-session system) that the exams of June 2022 will be the last chance for obtaining the IACPA, which is approved and issued by IASCA.

Trainees who wish to pass the exams and obtain the certificate are kindly requested to register and pass the qualifying exams before the abovementioned date; otherwise, they will have to re-sit the exams of the four qualifying subjects.

IACPA Examination Results of June 2021 Announced

AMMAN - The International Arab Society of Certified Accountants (IASCA) announced the examination results of the International Arab Certified Public Accountant (IACPA) certificate - June 2021 session.

Mr. Salem Al-Ouri, Executive Director of IASCA, said that the examination marking process was carried out by a specialized committee of experts, professionals and academics in accounting, auditing, economics, financial management and regulations.

IACPA exams are conducted twice a year in June and December in more than 36 centers

around the Arab world. Candidates should complete four papers in Economic, Finance, Accounting, Auditing, and Regulations in order to pass the IACPA examination.

IACPA curriculum has been developed in accordance with International Accounting Standards and

International Auditing Standards in collaboration with a group of consultants from IASCA.

It is worth mentioning that the certificate was accredited by Jordan, UAE, Yemen, Syria, Lebanon, Sudan, Qatar, Kurdistan Region (Iraq) as a requirement in order to obtain the license to practice the profession.

“Clarity” in the Fundamentals of Financial Accounting

To pass the JCPA exam

By Dr. Hussam Addin Ahmad Khalil – IASCA Member And:

Mr. Bahaa Muhammad Asafarini
Mr. Ehab Hussam Addin Khalil

The importance of the JACPA in cooperation with the Higher Council of the Accountancy Profession (HCAP) in Jordan, and the government oversight bodies is becoming crucial today. Moreover, this requires supporting professional auditors in their obtaining of licensing and allowing them to find the necessary references to back their professional and legislative materials.

Supporting a supervisory mechanism for those working in the audit profession will protect the rights of all the related parties and will reduce the gap emanating from the absence of internal administrative systems and/or tampering with the funds of corporations. This will also increase the academic and operational skills of auditors and the professionals who seek to obtain licenses to practice the profession of accountancy in Jordan.

This “Clarity” book which is full of examples and explanations helps understand the rules and standards of the profession by providing a strong theoretical background, and addressing the relevant legislations and those specifically dealing with Companies Law.

The author presents solutions to problems faced by accountants, auditors, and heads of accounting departments. It also provides full coverage of all the International Financial Reporting Standards (IFRS) using the question and answer format, in addition to brief explanations along with many examples that support all subjects relating to IFRS.

The scientific material of this book is divided into 10 chapters as follows:

Chapter One: The conceptual framework for the preparation and presentation of financial statements

Chapter Two: IAS (1) and the presentation of financial statements

Chapter Three: Inventory adjustments

Chapter Four: Bank reconciliation statement

Chapter Five: Money exchange companies

Chapter Six: Solidarity companies

Chapter Seven: Cash flow statement

Chapter eight: financial statements analysis

Chapter Nine: Consolidated financial statements

Chapter Ten: IAS (16) and property, plant and equipment

This book is based on scientific references such as:

1. The Encyclopedia of Applications of IFRS, IAS 7 - by Dr. Hossam Addin Ahmad Khalil.
2. The Jordanian Companies Law No. 22 for 1997 and the amendments thereof.
3. The latest version of the IFRS

IAASB Public Consultation Opens for Proposed New Standard for Audits of Financial Statements of Less Complex Entities

New Proposed Stand-Alone Standard to Meet Market Needs

NEW YORK - The International Auditing and Assurance Standards Board (IAASB) published an exposure draft of its new, stand-alone standard for audits of financial statements of less complex entities. This landmark new draft standard responds to demands to have a set of high-quality requirements tailored for the needs of less complex entities (LCEs). The new standard for audits of financial statements of LCEs will provide a globally consistent approach at a time where several jurisdictional-specific LCE standards or related initiatives are arising. The release of the exposure draft is part of a broader effort to reduce complexity, improve understandability, and make International Standards on Auditing (ISAs) more scalable and proportionate to circumstances of audited entities.

“Smaller, less complex entities play a vital role in the world’s economy. The IAASB has prioritized addressing the needs of stakeholders representing these entities over the last eighteen months,” said IAASB Chair Tom Seidenstein. **“Our new proposed standard’s objective is appropriately focusing the work of auditors through requirements designed to be proportionate to the typical nature and circumstance**

International Auditing
and Assurance
Standards Board

of less complex entities. We are not compromising on the quality of the audit.”

The IAASB strongly encourages all interested stakeholders to provide their feed-back by **January 31, 2022**. The standard is relevant to users of financial statements, owners, management and those charged with governance of entities, pre-parers of financial statements, legislative or regulatory authorities, relevant local bodies with standard-setting authority, professional accountancy organizations, academics, regulators and audit oversight bodies, and auditors and audit firms, among others.

Stakeholders can submit responses through the **“Submit Comment” button online**. The Exposure Draft will also be available in French and Spanish in early September 2021. The IAASB is also planning outreach on the new draft standard; an out-reach plan will be available on the IAASB’s website in late August 2021.

IFRS Foundation Responses to G20 Finance Ministers’ Communique

LONDON - the G20 Finance Ministers and Central Bank Governors published a [Communique](#) following their meeting in Venice, Italy, on July 10, 2021, referencing the IFRS Foundation.

The Communique states:

“We will work to promote implementation of disclosure requirements or guidance, building on the FSB’s Task Force on Climate-related Financial Disclosures (TCFD) framework, in line with domestic regulatory frameworks, to pave the way for future global coordination efforts, taking into account jurisdictions’ circumstances, aimed at developing a baseline global reporting standard. To that aim, we welcome the work program of the International Financial Reporting Standards Foundation to develop a baseline global

reporting standard under robust governance and public oversight, building upon the TCFD framework and the work of sustainability standard-setters, involving them and consulting with a wide range of stakeholders to foster global best practices.”

Commenting on the Communique, Erkki Liikanen, Chair of the Trustees, said:

We welcome the G20 Finance Ministers and Central Bank Governors’ recognition of the IFRS Foundation’s work to establish a new board focused on sustainability-related disclosure standards that meet the information needs of global capital markets. The necessary preparatory work is progressing with other

investor-focused standard-setting organisations. This will provide the basis for development of a global baseline of investor-focused disclosure standards that jurisdictions can combine with their public policy requirements and use in their legal frameworks.

The Trustees are currently consulting on [proposed changes to the Foundation's Constitution](#) to accommodate the creation of a new board within the Foundation's governance structure.

Keeping up with Changes to the International Code of Ethics for Professional Accountants: A Primer for SMPs and SMEs

Introduction

NEW YORK - The International Ethics Standards Board for Accountants (IESBA) has been busy recently, even since the start of the pandemic in 2020, with several upcoming changes to the International Code of Ethics for Professional Accountants (including International Independence Standards) (the "Code") on the horizon. It can be challenging for small- and medium-sized practices (SMPs) to keep up with these changes, and this has been consistently ranked as one of the top challenges in [surveys](#) conducted by IFAC. The [IFAC SMP Advisory Group](#) continues to actively monitor all ethics proposals and has formally responded to the multiple consultations and engaged with the IESBA often to provide input and suggestions with a focus on matters that impact SME and SMP constituents.

Below is a summary of the key changes to the Code that have been approved since early 2020 as well as the effective dates so SMPs and small and medium-sized entities (SMEs) can be prepared.

Alignment of Part 4B to ISAE 3000 (Revised)

Part 4B of the Code comprises the independence provisions for assurance engagements other than audit and review engagements. The revisions to Part 4B of the Code are to reflect terms and concepts used in the International Auditing and Assurance Standards Board's (IAASB) International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information and were developed in close coordination with the IAASB.

The main revisions include:

- Changes in key terminology, including a revised definition of the term "assurance client"
- Amendments to certain independence requirements in light of the revised assurance client definition

- Greater clarity as to the parties to an assurance engagement and their roles and responsibilities, and the related independence requirements that apply
- A clearer distinction between the types of assurance engagements covered in Parts 4A (addressing independence for audit and review engagements) and 4B of the Code.

The final pronouncement was released in January 2020 and just became effective on June 15, 2021.

Role and Mindset Expected of Professional Accountants

In October 2020, IESBA issued revisions to the Code to promote the role and mindset expected of professional accountants. A fact sheet outlines some of the key provisions and changes from the extant Code. Of particular importance are the following changes:

- Applying the conceptual framework requires that all Professional Accountants (PAs) have an inquiring mind when identifying, evaluating, and addressing threats to the fundamental principles. This prerequisite for applying the conceptual framework applies to all accountants regardless of the professional activity undertaken. Practitioners are also required to exercise professional skepticism when performing audits, reviews, and other assurance engagements under the IAASB standards.
- Clarification that compliance with the Code does not mean a professional accountant will have always met their responsibility to act in the public interest
- A clear message that compliance with the Code means not only compliance with the letter of the Code, but also with its spirit

- Strengthening of the fundamental principle of integrity through requiring pro-fessional accountants to have the strength of character to act appropriately, i.e., standing one’s ground when facing dilemmas and difficult situations, or challenging others as circumstances warrant
- Expansion to the other fundamental principles of objectivity, professional competence and due care, and professional behavior, including some enhancements that reflect the impact of technology
- Emphasis on the importance of being aware of one’s bias in the exercise of professional judgment, along with a list of 8 common examples of potential bias to be aware of
- A clear recognition of the importance that a positive internal organizational culture has on the effective application of the conceptual framework
- An explicit recognition that professional accountants have a role in promoting ethical behavior and culture in their organizations

These changes are effective as of December 31, 2021. Early adoption is permitted.

Please note the eleventh installment of the Exploring the IESBA Code series addresses bias and the role and mindset of the professional accountant.

Non-Assurance Services

In April 2021, IESBA released revisions to the Non-Assurance Services (NAS) provisions of the International Independence Standards. The revised NAS provisions clarify and address circumstances in which firms and network firms may or may not provide a NAS to an audit or assurance client. IESBA put together a mapping document that outlines the revisions by section of the extant Code and is helpful in understanding the key changes, which include the following:

- A new general prohibition on the provision of a NAS to an audit client that is a PIE if the provision of that service might create a self-review threat to the firm’s independence
 - New provisions to assist firms and network firms in identifying and evaluating self-review threats that might be created by the provision of a NAS to an audit client
 - New guidance indicating that the provision of advice and recommendations might create a self-review threat and explaining the

circumstances in which a firm or a network firm may provide advice and recommendations to an audit client

- New provisions to strengthen and improve the quality of firm communication with those charged with governance (TCWG) about NAS-related matters, especially in the case of audit clients that are PIEs and entities within that PIE’s corporate structure
- Enhanced guidance to explain that the concept of materiality is not relevant in evaluating whether a self-review threat might be created by the provision of a NAS to an audit client that is a PIE
- Strengthened provisions to assist firms in addressing threats to independence that might be created by the provision of NAS to audit clients that are not PIEs, including new application material in relation to situations where a safeguard is not available
- New provisions and structural refinements to promote the consistent application of the NAS provisions.

One of the more significant changes relates to firms providing accounting and bookkeeping services. Whereas the extant Code noted that providing such services to an audit client might create a self-review threat, the revised guidance makes clear that providing these services creates a self-review threat when there is a risk that the results of the services will affect the accounting records or the financial statements on which the firm will express an opinion.

Examples of actions that might be safeguards to address a self-review threat created when providing accounting and bookkeeping services of a routine or mechanical nature to an audit client that is not a public interest entity include:

- Using professionals who are not audit team members to perform the service.
- Having an appropriate reviewer who was not involved in providing the service review the audit work or service performed

These revisions are effective December 15, 2022. Early adoption is permitted.

Fees

In April 2021, IESBA also released revisions to the fee-related provisions of Parts 4A and 4B of the Code. The changes include:

- A prohibition on firms allowing the audit fee to be influenced by the provision of services other than audit to the audit client.

- Enhanced guidance for identifying, evaluating and addressing threats to independence in relation to other fee-related matters, including the proportion of fees for services other than audit to the audit fee.

As it relates to the proportion of fee provisions noted above, the revised guidance states that when for each of five consecutive years total fees from an audit client that is not a public interest entity represent, or are likely to represent, more than 30% of the total fees received by the firm, the firm shall determine whether either of the following actions might be a safeguard to reduce the threats created to an acceptable level, and if so, apply it:

- Prior to the audit opinion being issued on the fifth year's financial statements, have a professional accountant, who is not a member of the firm expressing the opinion on the financial statements, review the fifth year's audit work; or
- After the audit opinion on the fifth year's financial statements has been issued, and before the audit opinion is issued on the sixth year's financial statements, have a professional accountant, who is not a member of the firm expressing the opinion on the financial statements, or a professional body review the fifth year's audit work.

In the case of audit clients that are PIEs, the following changes also apply:

- A firm is required to cease to be the auditor of a PIE audit client if the audit fee exceeds more than 15% of the total fees by the firm for five consecutive years, unless they meet specific criteria for an exception.
- A requirement to communicate fee-related information to TCWG, and to the public to assist their judgments about auditor independence.

These revisions are effective as of December 15, 2022, with early adoption permitted.

Objectivity of an Engagement Quality Reviewer and other Appropriate Reviewers

In January 2021, IESBA released revisions to the Code addressing the objectivity of an engagement quality reviewer (EQR) and other appropriate reviewers. This project was closely coordinated with the IAASB project to develop the International Standard on Quality Management (ISQM) 2, Engagement Quality Reviews, which was finalized in December 2020.

The revisions provide guidance that supports ISQM 2 in addressing the eligibility of an individual to serve in an EQR role, focusing on the critical attribute of objectivity. Among other matters, the guidance:

- Elaborates on the need to identify, evaluate and address threats to compliance with the fundamental principle of objectivity that might arise in the appointment of an individual as an EQR for a given engagement
- Explicitly refers to and supports the requirement in ISQM 2 for a firm to establish, as a condition for eligibility, a cooling-off period of two years before an engagement partner can assume the EQR role on the same engagement
- Emphasizes that this cooling-off requirement in ISQM 2 serves the dual objective of supporting compliance with the fundamental principle of objectivity and the high quality of engagements

The guidance may also apply in situations where, as a safeguard to address identified threats to compliance with the fundamental ethics principles, an individual is appointed as an appropriate reviewer for work performed.

The enhanced guidance will become effective on December 15, 2022.

Conclusion

It is critical that SMPs keep up with all of these upcoming changes to the Code. IFAC continues to support the adoption and implementation of international standards and develop resources to assist PAs as they navigate these changes.

Additional Resources

There are numerous additional guidance and support resources available on the dedicated 'Supporting International Standards' and "Building Trust and Ethics" sections of the Knowledge Gateway.

IFAC has also highlighted the importance of professional accountants leading reporting and assurance on sustainability and recently published Accelerating Integrated Reporting Assurance in the Public Interest.

In addition, the IAASB have released new Guidance on Applying ISAE 3000 (Revised) to Extended External Reporting Assurance Engagements.

There are several other additional projects that IESBA is currently working on, view a full listing of their project timetable as of June 2021.

Technical Readiness Working Group

LONDON - In answer to the growing and urgent demand to improve the global consistency and comparability of companies' sustainability disclosures to meet the needs of investors and other capital market participants, the Trustees of the IFRS Foundation are working toward the creation of an international sustainability standards board. The Trustees are assessing whether they can achieve their criteria for creating such a board and intend to make a final determination by COP26 in Glasgow.

To enable the potential new board to build on the well-established work of long-standing international initiatives focused on enterprise value, the Trustees have created the Technical Readiness Working Group (TRWG) of leading organizations with expertise in sustainability and integrated reporting standard-setting focused on meeting investors' needs.

The TRWG aims to provide a running start for the potential new board, as described in the Trustees' March 8, 2021 statement. The TRWG also responds to the International Organization of Securities Commissions' (IOSCO) February 24, 2021, call for the coordination of work to drive international consistency of companies' sustainability-related disclosures that focus on enterprise value creation.

The TRWG's role is to provide technical observations and proposals for consideration by the potential new board, as well as to formulate joint strategic recommendations regarding the potential transfer of content, technical expertise and resources to the board.

Participants of the TRWG will meet regularly at three types of meetings:

(1) Strategic meetings

The TRWG conducts monthly and ad hoc strategic meetings, which are chaired by a member of

the Foundation's Trustees Steering Committee on Sustainability Reporting (Trustees Steering Committee). The Foundation and member organizations may also hold complementary bilateral discussions as needed to realize the overall plan.

(2) Operational and Technical meetings

Member organization meet for fortnightly discussions, chaired by the Foundation's Executive Director. The purpose of the operational and technical meetings is to:

- prepare material to inform strategic discussions about the potential transfer of technical expertise and resources to the potential new board; and
- oversee technical proposals from working-level meetings.

(3) Working-level meetings

The TRWG conducts weekly working-level meetings attended by leading technical staff of member organizations and facilitated by a leading Foundation staff member. The working-level meetings conduct the detailed technical work required for the TRWG to fulfil its deliverables.

The State of Play in Sustainability Assurance

LONDON - As the drive toward a global system for sustainability-related reporting continues, investors, regulators and policymakers are turning their attention to the important role of assurance in ensuring high-quality reporting. With the growing importance of—and reliance on—sustainability information, low-quality assurance is an emerging investor protection and financial stability risk.

Benchmarking Global Practice

This global benchmarking study captures and analyzes the extent to which companies are reporting and obtaining assurance over their sustainability disclosures, which assurance standards are being used, and which companies are providing the assurance service.

The data shows a situation that is still evolving, with significant differences in practices across different

International
Federation
of Accountants®

jurisdictions. Around half of companies reviewed are publishing sustainability information that is subject to any assurance. For those that do obtain assurance, it is often being provided by consultants or others, and not by independent professional accountants who possess the unique combination of skills, qualifications, experience, and professional ethical obligation to act in the public interest.

[Download](#) the study to learn more.

IFAC

Mapping Global Reporting and Assurance Practices

LONDON - This map shows a global snapshot of reporting and assurance practices including the rate of ESG assurance, the percentage companies reporting on ESG in a jurisdiction, and the percentage of assurance that is being provided by audit or affiliated firms.

91% of companies reviewed report some level of sustainability information.

51% of companies that report sustainability information provide some level of assurance on it.

63% of these assurance engagements were conducted by audit or audit-affiliated firms.
